To whom it may concern

Testimonial for the KWIKKEE quick release chocker chain attachment. We are finding that we are using the KWIKKEE more often than not in areas that require the riggers/dogmen to use ladders, scissor hoists or a dog box to release the load once secured and fixed in place. Applications include lifting structural posts and beams, lowering pipes into trenches the list goes on. In one particular instance we were required to land beams complete with support posts over a cliff face. Impossible to achieve without the use of a dog box and second crane. This was until the KWIKKEE was available. Simple quick and easy to install and just as quick to release the load when required. I have no problem recommending the KWIKKEE to all crane operators as a back up tool for multiple lifting applications.
