Testimonial – Kwikkee

Our workers benefit daily by the use of the Kwikkee to remove and release scaffolding onto loading docks and formwork onto suspended decks. The Kwikkee makes lifting and placing of loads quick and effortless which saves time and stress for our workers. The Kwikkee enables us to place the load onto the truck from the ground which maximises safety in our workplace. This is an impressive device which we will use over and over again. We have no hesitation in recommending the Kwikkee as we have found the safety aspect and time saved on the job makes this a valuable tool in our workplace.
